

FUNCTIONS

BEGINNER LEVEL

1. Create a function that prints "Hello World!".
2. Create a function that takes two numbers and returns their sum.
3. Create a function to find the square of a number.
4. Create a function to check whether a number is even or odd.
5. Create a function that takes a name and prints a greeting message.
6. Create a function to find the length of a string.
7. Create a function to convert Celsius temperature into Fahrenheit.
8. Create a function to find the absolute value of a number.
9. Create a function that works as an addition calculator.
10. Create a function to print the multiplication table of a number.

INTERMEDIATE LEVEL

11. Create a function to calculate factorial using a loop.
12. Create a function to check whether a number is prime.
13. Create a function to generate Fibonacci series.
14. Create a function to reverse a string.
15. Create a function to calculate sum of list elements.
16. Create a function to find the largest element in a list.
17. Create a function to check Armstrong number.
18. Create a function to remove duplicates from a list.
19. Create a function to print a star pattern.
20. Create a function to print a matrix.

ADVANCED LEVEL

21. Create a recursive function for factorial.
22. Create a recursive function for Fibonacci.
23. Create a function to check palindrome string.
24. Create a lambda function for square.
25. Create a function with default arguments.
26. Create a function returning quotient and remainder.
27. Create a function calling another function.
28. Create a grade calculator function using marks.
29. Create a function to count vowels.
30. Create a function to find prime numbers in a range.
