

Loops 1

Basic Loop Questions

1. Print numbers from 1 to 10 using a for loop.
2. Print numbers from 10 down to 1 using a while loop.
3. Print the multiplication table of 5 using a loop.
4. Print all even numbers between 1 and 50.
5. Calculate the sum of numbers from 1 to 100 using a loop.

Intermediate Loop Questions

1. Print the factorial of a given number using a loop.
2. Reverse a string using a loop.
3. Count the number of vowels in a given string using a loop.
4. Print the Fibonacci series up to n terms using a loop.
5. Print all prime numbers between 1 and 50 using loops and conditionals.

Advanced Loop Questions

1. Print a pyramid pattern of stars (*) using nested loops.
2. Print an inverted pyramid pattern of stars using nested loops.
3. Write a program that takes a list of numbers and prints only the positive ones using a loop.
4. Write a program that finds the largest element in a list using a loop (without max()).
5. Write a program that prints all unique elements from a list using loops.
6. Write a program that prints the sum of digits of a number using a loop.
7. Write a program that checks if a number is an Armstrong number using a loop.
8. Write a program that prints a multiplication table from 1 to 10 using nested loops.
9. Write a program that prints a right-angled triangle of numbers using nested loops.
10. Write a program that prints all elements of a dictionary using a loop.
