

Condition1.PY

Basic

Write a program that checks if a number is positive, negative, or zero.

Take a student's marks and print "Pass" if marks ≥ 40 , otherwise "Fail."

Write a script that checks if a number is even or odd.

Create a program that compares two numbers and prints which one is greater or if they are equal.

Write a program that checks if a given year is a leap year.

Intermediate

Write a program that categorizes salary:

Above 100,000 $\rightarrow$ "High Earner"

50,000–100,000 $\rightarrow$ "Mid Earner"

Below 50,000 $\rightarrow$ "Low Earner"

Create a grading system:

$\geq 90 \rightarrow A$

75–89 $\rightarrow B$

50–74 $\rightarrow C$

$< 50 \rightarrow \text{Fail}$

Write a program that checks if a number is divisible by 2, 3, or both.

Write a program that takes a username and password as input and validates them against predefined values.

Write a program that checks if a character entered is a vowel or consonant.

Advanced

Write a program that takes three numbers and prints the largest using conditionals (without `max()`).

Create a program that checks if a string contains the word “Python” and prints a message accordingly.

Write a program that calculates electricity bill based on units consumed:

First 100 units → ₹5 per unit

Next 100 units → ₹7 per unit

Above 200 units → ₹10 per unit

Write a program that takes age and income as input and decides loan eligibility:

Age between 21–60 and income $\geq$ 30,000 → Eligible

Otherwise → Not Eligible

Write a program that takes a list of student marks and prints only those who passed (marks $\geq$ 40).
